

ABOUT US

We believe doctors should focus on their patients' wellbeing and that our systems should help make the doctor and patient's life easier.

Over the last 33 years, we have become one of the market leaders in the development of tailored medical and practice management software in the South African market.

We proudly cater to the following practice types:

GENERAL PRACTITIONERS
SPECIALISTS
DENTAL HEALTH PROFESSIONALS
ALLIED HEALTH PROFESSIONALS
GROUP PRACTICES
LABS & RADIOLOGY
HOSPITALS
MEDICAL BUREAUX

FAMILY OF PRODUCTS

MEDICONNECT

COMPLETE MEDICAL PRACTICE MANAGEMENT SOLUTION

A complete and unified web application for every role in the medical practice. Simplified billing, flexible scheduling, insightful reporting and easy-to-use patient relationship management tools.

WEB-BASED

Access your data from anywhere, anytime from any device. The software solution provides remote, safe storage and access to all your data via the internet. We use real-time replication to improve failover time in the event of a disaster and also have offsite backups.

EASY TO USE

Web-based system providing easy and fast patient input and billing, real-time medical aid claiming, smooth scripting, electronic pathology tests and integrated clinical notes. Reduce the administrative burden by making use of the *myGrandCentral* app to receive patient payments.

ELECTRONIC MEDICAL RECORDS (EMR)

Implementing an EMR increases medical practices' productivity and the quality of medical care given to patients. This improves patient care by a reduction in medication errors and duplicates or unnecessary pathology tests.

CUSTOMISABLE CLINICAL TEMPLATES

Customise your clinical templates to fit your practice type, workflow and preferences. It's a faster, simpler way to capture patient data according to your specific requirements, giving you software that fits your practice.

PAPERLESS CAPABILITY

From link-based home registration and kiosk registration on *myGrandCentral*, to electronic clinical notes and a purely paperless document manager, the software allows for a fully paperless practice. Notes, vitals, side room investigations and JACCOLD sections are provided that visually flag risks like Framingham.

FULLY INTEGRATED DIARY

A powerful and robust diary that is customisable for each user. Customisations include booking statuses, diary display modes, colours and visibility as well as a diary-integrated task list. The diary integrates with the *myGrandCentral* patient portal to easily import patient demographics.

ONLINE BOOKINGS & PATIENT PORTAL

myGrandCentral (mygc.co.za) is a convenient, intuitive, online portal for your patients. Our software delivers all the self-help and self-service features patients demand, automated to reduce work for your staff.
